lim (R34 9.09k):
typ: 0.73A
-6/+4 %
TPS26621 D18

The schematic shows the internal components of the TPS26621 D18 module. The module is connected to a 3V3 supply and a SW_EN input. The output is labeled VBUS_OUT. The schematic also shows the connection to a TP35 test point.

Ilim (R34 9.09k):
typ: 0.73A
-6/+4 %
TPS26621 D18

Power Over Dataline

Coupling Network – Port 1

Coupling Network – Port 2

Port 1

DC Connection + Circuit protections

Snubber resistors must be at least 1/2 W, to support hot-plugging.

Port 2
